Revised 2/20/2014

Section 1— Introduction

This guide was developed to assist educators in understanding and using the Fall 2013 Michigan Educational Assessment Program (MEAP) results. Reports prepared for the MEAP include both individual level (Individual Student Report, Parent Report, Class Roster, Student Label) and aggregate level reports (Comprehensive Report, Demographic Report, Item Analysis Report, Summary Report).

Aggregate reports reflect the data needed to meet state and federal legislative requirements. In accordance with these mandates, separate aggregate results are provided for the following student populations: 1) all students, 2) students with disabilities.

Reports included in district and school packets are listed in the table on page 5. Included in the table is a brief description of each report, a list of the student populations represented in the report, and the report recipients. Detailed descriptions of the reports are provided in Section 3 of this guide. **Schools must distribute MEAP Parent Reports to students' parents or guardians as soon as possible after printed reports arrive,** if a copy of the report has not already been distributed.

All MEAP PDF Reports are available via the Bureau of Assessment and Accountability (BAA) Secure Site. Beginning with Fall 2013 test results, hard copies are printed for Parent Reports, and Student Labels only.

Fall 2013 Highlights

Online Social Studies and Science

Students who participated in the Fall 2013 MEAP Online Social Studies and Science are included on student level reports and their results have been incorporated into the aggregated reports. These students are not identified as online students on the paper and PDF reports, however, they are flagged as tested online in the school's Student Data file.

Item Descriptors

MEAP Item Descriptor documents will be available for each grade level and each subject area assessed in fall 2013. These documents can be accessed at www.michigan.gov/meap. In addition, Narrative and Informational Writing Scoring Guides are available at www.michigan.gov/meap, as well as, the Analytic and Holistic Writing Rubrics.

Item descriptors will be available for 100% of operational test items from the fall 2013 MEAP administration. They identify the Grade Level Content Expectation (GLCE) being assessed and provide a general description of the item itself, an indication of which response was the correct response, a description of the distracters, and in most cases, a description of why each distracter was an incorrect response. The purpose of item descriptors is to provide educators with instructionally-relevant data about student performance on state assessments.

Invalid Tests

Students who attempted a MEAP content area test in fall 2013 but did not receive a valid test score are now reported on the student level reports. While the test score is not reported, the reason for the invalid test is provided. These students do not count toward accountability but will negatively impact participation rates. Students who do not receive a valid score will not be reported on aggregated reports. Tests may be flagged as invalid for the following reasons:

- Student Prohibited Behavior
- Tested in incorrect grade (Out of Level)
- Did not meet "attemptedness" criteria
 - Less than 5 multiple choice responses bubbled
 - All constructed response items blank

- Non-standard accommodation administered
- Missing MSDS data (cannot properly identify student)
- Other mis-administrations
 - Student not given correct test
 - Multiple answer documents returned
 - See MEAP Test Administration Manual for additional examples

Contact Us

The Division of Accountability Services (DAS) welcomes your comments and feedback. We are committed to providing Michigan students, educators, parents, and other stakeholders an assessment program of the highest quality and reliability.

Phone: 1-877-560-8378, option 2 Fax: 517-335-1186 E-mail: BAA@michigan.gov

Fall 2013 MEAP Report Descriptors

Report	Description	Population	Distribution
Individual Student Report (ISR)	Separated by content area, the ISR provides detailed information on individual student achievement, including scale score, performance level, earned points and points possible. Sorted by class/group code (if provided), and student name.	All Students	Available to School as PDF
Student Label	Summarizes individual student achievement in each content area.	All Students	1 copy to School
Parent Report	Summarizes individual student achievement in each content area, including earned points and points possible, percent correct, and performance level change information (if applicable).	All Students	1 copy to School (to be distributed to students' Parents/ Guardians)
Class Roster	Separated by content area, the roster provides detailed information on student achievement, including scale score, performance level, earned points and points possible. Sorted by class/group code (if provided), and student name.	All Students	Available to Class/Group School as PDF
Item Analysis Report	Separated by content area, the item analysis provides the primary GLCE measured by each test item, a brief description of the GLCE, the item descriptor number, and individual item statistics, including the percentage of students selecting each response.	All Students Students w/ Disabilities All Except Students w/ Disabilities	Available to Class/Group School District State as PDF
Summary Report	Summarizes student achievement for all content areas, including mean scale score and performance level information, as well as yeartoyear transitions. The School Summary also provides student score distributions for each content area.	All Students Students w/ Disabilities All Except Students w/ Disabilities	Available to School District ISD State as PDF
Demographic Report	Summarizes the total number of students assessed, mean scale score, and performance level information for each demographic subgroup containing at least 10 students.	All Students Students w/ Disabilities All Except Students w/ Disabilities	Available to School District ISD State as PDF
Comprehensive Report	Summarizes the total number of students assessed, mean scale score, and performance level information for the district or ISD. The district report provides a summary for the district and each school within the district. The ISD report provides a summary for the ISD, followed by each public school district, and then each Public School Academy (PSA) within the ISD.	All Students	Available to District ISD as PDF

Section 2: Scoring

Definitions

All of the processes employed to assess overall student performance begin at the item level. There are two types of items on the MEAP: Multiple Choice (MC) items and Constructed Response (CR) items. Item scores are used to create subscores for each content area and are used in the statistical models and transformations that result in scale scores.

Multiple Choice Item Scores

The majority of the MEAP is comprised of multiple choice items. For these items, students select from the available options, only one of which is a correct response to the item. Students who select only the correct option receive a score of one (1) on the multiple choice item. Students who select one of the incorrect options, multiple options, or did not respond receive a score of zero (0). The string of responses from the multiple choice items (e.g. 1,0,0,0,1,...,1) serve as input for the statistical models used to derive scale scores. Multiple choice items are scanned and scored by computer.

Constructed Response Item Scores

In Fall 2013, the reading and writing tests contained operational constructed response items. The reading operational item was a 3-point reading comprehension item. The rubric used to score each grade-level reading comprehension item contains language directly from the reading passage, such that publishing the rubric would compromise the reading passage itself. For this reason, the scoring rubric is available on the MEAP website; however, an item descriptor for each grade level is published in the MEAP Item Descriptors located on the MEAP website (www.michigan.gov/meap).

Reading constructed response items requiring short answer responses are evaluated by human scorers. Guided by precise criteria, scorers review a response for accuracy and completeness and assign 0 to 3 points based on how well the requirements of the prompt are fulfilled. Extensive professional practice and research have refined and validated the critical steps that ensure consistency in scoring. Scorers are trained to ignore extraneous factors such as neatness and to focus on the comprehension demonstrated in the response. Due to the high-stakes nature of these large-scale assessments, the DAS has taken every step possible to minimize scoring subjectivity.

Three writing constructed response items are included in the writing tests: a Narrative Writing prompt, an Informational Writing prompt and a Peer Response to the Student Writing Sample. The Narrative and Informational prompts are scored using analytic scoring rubrics. Trait ratings include 3 points per trait for Ideas (points doubled), Organization, Style and Conventions. The Peer Response to the Student Writing Sample is scored using a holistic rubric with ratings from 0-4. Again, scorers are extensively trained to score student writing and avoid scoring subjectivity. Scorers are trained to ignore extraneous factors such as neatness and focus on the strengths of the responses rather than the weaknesses. Rubrics and scoring guides for the three writing prompt types can be found at www.michigan.gov/meap.

Scale Scores

MEAP scale scores are created from statistical scoring models that make use of each student's responses to both the Multiple Choice (MC) and Constructed Response (CR) items. The purpose is to model students' overall achievement in each content area based on the Michigan Grade Level Content Expectations (GLCEs). MEAP scale scores are equated from year to year and form to form, meaning that any differences in the difficulty of items from one year to the next or from one form to the next are accounted for in the calculations of the scale score for the current cycle. Therefore, MEAP scale scores from the same grade and subject can be compared against each other regardless of the year or form of the MEAP the student took.

A simple Item Response Theory (IRT) model: the Rasch Partial Credit (1-parameter) model is used to determine the students' ability estimates. The use of this model results in a table for each subject area that describes a one-to-one relationship between the number of points earned by a student and the scale score earned by the student. This one-to-one relationship between points earned and scale score is a by-product of the statistical scoring model used for scoring the MEAP assessment. Some reports are reported by subscore (domain, focal point, or discipline). Subscores are not equated from year to year, therefore, are less reliable than scale scores and provide only an approximate measure of student performance.

Performance Levels

MEAP scale scores within each subject area can be described in ranges. The labels applied to these ranges are known as performance levels. The MEAP performance levels are: (1) Advanced, (2) Proficient, (3) Partially Proficient, and (4) Not Proficient. The divisions between the levels are often referred to as *cut scores*. Scale score and performance level range tables are located on the following pages.

The cut scores are typically recommended by a panel comprised of educators and other stakeholders throughout the state in a process known as standard setting. To set these standards, the panel uses detailed descriptions of what students in each of

of the performance levels should know and be able to do. Based upon these detailed descriptions and actual assessment items, the panel recommends the score that best separates each performance level from the next to the Michigan Superintendent of Public Instruction. The State Superintendent then recommends the results of the standard setting (or modifications of these standards) to the Michigan State Board of Education (SBE). The SBE is the authority who approves the final cut scores and performance level ranges. While the performance level descriptors necessarily differ by grade and subject area, student achievement, as defined by the obtained performance level, can be reasonably compared across subjects within a grade. Such a comparison can be used to indicate whether students are meeting Michigan grade level content expectations in each subject.

In fall 2011, new cut scores were established to ensure parents, students, and teachers are well informed about where students stand relative to being on-track to proficiency in the next grade for grades 3-9, and on-track to career– and college-readiness in high school. The prior cut scores represented a more basic level of achievement needed for the old manufacturing economy. As a result, the career-and college ready cut scores adopted in September, 2011 were noticeably higher than previous years. The new cut scores have been applied to previous years' data allowing for meaningful trend comparisons. Additional information on cut scores can be found at www.michigan.gov/meap.

MEAP Score Categories and Scale Score Ranges Fall 2013 — Grades 3-9

Revised 2/20/2014

		Level 4	Level 3	Level 2	Level 1

Ranges within 2013 MEAP Performance Levels

Because mathematics and reading are assessed each year in grades 3 through 8, it is possible to track changes in individual students' achievement from grade-to-grade. Tracking transitions between the four performance levels (Not Proficient, Partially Proficient, Proficient, and Advanced) can be made more precise by tracking changes within each performance level (for example, a transition from the low range of the Proficient category to the high range of that same category). These small ranges are presented in the table below. (Revised 2/20/2014)

						Ranges				
Subject	Subject Grade	Not Proficient		Partially Proficient		Proficient			Advanced	
		Low	Mid	High	Low	High	Low	Mid	High	Mid
	3	203-301	302-312	313-321	322-328	329-335	336-344	345-355	356-370	371-412
	4	283-400	401-412	413-422	423-427	428-433	434-443	444-455	456-469	470-549
Math	5	366-482	483-500	501-515	516-522	523-530	531-545	546-563	564-583	584-665
Math	6	467-585	586-600	601-613	614-620	621-628	629-641	642-656	657-674	675-760
	7	571-685	686-700	701-713	714-721	722-730	731-743	744-758	759-775	776-863
	8	674-784	785-797	798-808	809-818	819-829	830-840	841-851	852-864	865-950
	3	189-275	276-288	289-300	301-311	312-323	324-335	336-348	349-363	364-439
	4	283-362	363-379	380-394	395-406	407-418	419-434	435-452	453-477	478-531
Pooding	5	385-474	475-488	489-500	501-510	511-520	521-532	533-546	547-564	565-633
Reading	6	488-579	580-591	592-601	602-609	610-618	619-628	629-639	640-652	653-730

	8	685-772	773-784	785-795	796-806	807-817	818-828	829-839	840-852	853-921

MEAP - FALL 2013 Guide to Reports

MEAP Performance Level Change

Performance level change is used to compare student performance from year to year, and applies only to MEAP reading and mathematics because these are the only subjects tested each year in grades 3-8. Using the old MEAP cut scores prior to September 2011, each of the four performance levels (advanced, proficient, partially proficient, and not proficient) were wide enough to have a high, mid, and low range reliably distinguishable within each performance level. This more precise categorization is useful for tracking performance level change because it allows for the detection of changes *within* a performance level, not just between performance levels. Applying the new, more rigorous career— and college-ready cut scores, some of the performance levels are not wide enough to reliably distinguish between three ranges within the performance level. Because of this, a 9 x 9 transition table is now used (instead of the former 12 x 12) to track performance level change.

The table below delineates the transitions a student can demonstrate on the MEAP reading and mathematics assessments from year to year. On the left side of the table is the previous year's MEAP achievement divided into the various ranges of performance levels. Across the top of the table is the current year's MEAP achievement. Each student's change in performance can be described as fitting into one of these cells by looking at the combination of the performance in the previous grade and the current grade. For example, a student who scored in the low Proficient range both last year and this year will fit within the cell "M", indicating the student is maintaining the performance level achieved in the previous year.

Transition categories are: Significant Decline (SD), Decline (D), Maintaining (M), Improvement (I), or Significant Improvement (SI). These categories reflect whether students are changing their performance relative to increasing expectations.

_	·			Y	ear X+1 Grade	Y+1 MEAP Per	formance Leve	<u></u>

Section 3: Reporting

The sample reports included in this Guide to Reports are intended to provide examples of the report formats, data organization, and types of information contained in each report.

Data contained in these sample reports do not refer to any specific district, school, assessment item, or student.

Individual Student Report (ISR)

The intent of the Individual Student Report (ISR) is to provide a detailed description of each student's performance in the MEAP subject areas assessed in that grade level. This report is designed to help educators identify a student's academic strengths and areas which may need improvement. Schools may include these reports in student record files.

Section A identifies the title of the report, the subject area, the grade level, and the assessment cycle. It also lists the name of the teacher (if provided using a Class/Group ID sheet when answer documents were returned for scoring, or if entered during Tested Roster), class/group code, and the names of the school and district the student was enrolled in at the time the assessment was administered.

Section B contains student identification and demographic information, as well as a summary of the student's performance in that subject area. The specific identification and demographic fields reported are:

Student Name Ethnicity

District Student ID English Language Learner

Date of Birth Formerly LEP
Student UIC Special Education
Gender Accommodations

If a student's test was marked invalid, a short reason will be provided. Performance data is not provided for invalid tests in Section C and, if applicable, Section D.

Section C provides detailed information on the individual student's performance on each assessment item. All items, except for field test items, are included. The number of points earned and the total number of points possible are reported. Fall 2013 Item Descriptor booklets can be found for each grade level and subject area on the MEAP website at www.michigan.gov/meap.

Section D appears on the ISR for reading and writing. It provides constructed response data, including the number of points possible and the number of points earned by the student. Writing trait ratings are provided for writing prompts and condition codes are reported if applicable. If a condition code is present, then the student receives an overall score of zero (0) for the item. A description of the condition codes is provided in the legends at the bottom of the reading and writing ISRs.

Student Record Label

A Student Record Label is provided for each student assessed during the fall 2013 cycle. The labels are mailed to the school for placement in the student record file (CA-60).

Section A contains the district name and code and the school name and code.

Section B contains the student's name, Unique Identification Code (UIC), District Student ID (STU), if provided by the school, date of birth, gender, and grade.

Section C contains the subject areas assessed, the Scale Score (SS) received, and the Performance Level the student attained in each subject area. The Performance Level Change in mathematics and reading is reported for students in grades 4-8.

Performance Levels

Level 1 - Advanced

Level 2 - Proficient

Level **3** – Partially Proficient

Level 4 - Not Proficient

Performance Level Change Ranges

SI – Significant Improvement

I - Improvement

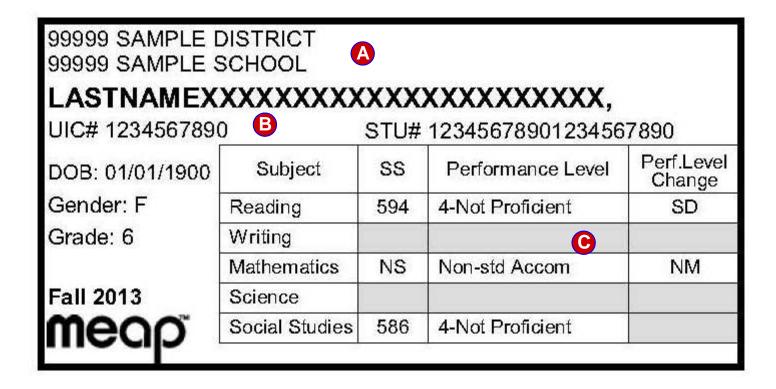

M - Maintaining

D - Decline

SD - Significant Decline

NM - No valid matching student record

If the student was not assessed in a subject area, or if the test was marked invalid, a Scale Score cannot be reported and the reason is indicated in the Scale Score and Performance Level columns.

Parent Report

The intent of the Parent Report is to provide a summary description of their student's performance in each subject area assessed on the MEAP. This report is designed to help parents and guardians identify the academic strengths of their student and areas that may need improvement. Information from this report may be helpful when discussing academic progress of the student with the classroom teacher(s). *Please ensure that Parent Reports are distributed to parents or guardians as soon as possible after printed reports arrive at your school.*

Section A provides the title of the report, the grade the student was in when the assessment was administered, the assessment cycle, the name of the student, and the student's Unique Identification Code (UIC). It also lists the name of the school and the school district the student was enrolled in at the time the assessment was administered.

Section B consists of a brief introductory letter addressed to the parent or guardian of the student describing the purpose of the MEAP, advising of any major changes, and offering suggestions on how the MEAP results might be used.

Section C gives a brief description of each of the four performance levels.

Section D provides the student's scale score and performance level obtained in each subject area assessed for the current year.

Section E provides performance level change information in reading and mathematics from the previous test administration to the current MEAP administration. Performance level change information is available only for reading and mathematics because these are the only two subjects assessed each year.

Section F describes in more detail how the student performed in each subject area.

Fa gives a short explanation of the assessment for each subject area. In addition, the student's performance level for the subject is listed with information on how the performance relates to Michigan standards. For example, if a student received a Level 2 on the eighth grade mathematics assessment, that student is "Proficient" and has met grade level level expectations for Michigan students.

Section F continued

Fb provides a graphical representation of the student's overall performance on a specific subject area assessment.

Fc consists of more detailed information regarding the student's performance. Each subject area is divided into sub score groupings: mathematics is divided into focal points, science is grouped within disciplines, and reading, writing, and social studies are divided into domains. For each subject area, the total points earned versus the total points possible for each subscore grouping is reported.

Writing is reported differently. The narrative writing and the informational writing prompts' rubric scores are listed for each writing trait. If received, the condition code is reported and the student will earn a total score of zero (0) for the prompt. A description of the condition codes is provided. In addition, the multiple choice test items and the Peer Response to the Student Writing Sample score (listed as Revise Drafts) are reported for each student.

NOTE: The MEAP results for individual students are most reliable and valid at the overall scale score level for each subject. These scale scores are reliably associated with a performance level. Parents can have confidence that the reported scale scores and performance levels provide accurate information for each subject. Student subscores (at the domain, focal point, or discipline level) are less reliable measures than scale scores and performance levels because there are fewer items per subscore grouping. The subscore results provide only an approximate measure of the student's performance level. Parents should be careful in drawing conclusions about a student's strengths or weaknesses at the subscore level. It is more appropriate to use this subscore information together with classroom assessment data, information provided by the student's teacher(s), and other performance information to guide learning activities.

Parent Report

Grade 05 Fall 2013

District Code: 99999

School Name: SAMPLE SCHOOL School Code: 99999

Report For:

UIC: 1234567890

Dear Parent or Guardian:

In fall 2013, schools across Michigan administered the Michigan Education Assessment Program (MEAP) to students in grades 3 through 9. Reading and mathematics are assessed in grades 3 through 8, writing in grades 4 and 7, science in grades 5 and 8, and social studies in grades 6 and 9. (For more detail, visit www.mi.gov/meap.)

MEAP assessments are linked to Michigan's content standards and measure what students are expected to know and be able to do at each grade level and content area to be on-track for career- and college-readiness upon their high school graduation. These assessment results can be used together with other assessment and classroom performance information to provide a more complete picture of student progress and achievement

Lencourage you to discuss your student's MEAP results with teachers and other school professionals who know your student personally. Student performance is reported as: Not Proficient, Partially Proficient, Proficient, or Advanced. A brief description of each performance level has been included.

Parents/quardians and teachers have a greater chance of helping students succeed when they work together to encourage student learning. It is important to know what content is being covered in your student's courses throughout the school year and when your student's homework assignments are due. Discuss your student's studies and interests regularly. Help your student seek learning opportunities outside of school. One resource I highly recommend is the free, online Michigan e-library (www.mel.org).

I hope you find this report both helpful and informative.

July Hang

Mike Flanagan State Superintendent Michigan Department of Education

Performance Level Descriptors

Level 1: Advanced (I 1)

The student's performance exceeds grade level expectations and indicates substantial understanding and application of key concepts defined for Michigan students. The student needs support to continue to excel.

Level 2: Proficient (L2)

The student's performance indicates understanding and application of key grade level expectations defined for Michigan students. The student needs continued support to maintain and improve proficiency.

Level 3: Partially Proficient (L3)

The student needs assistance to improve achievement. The student's performance is not yet proficient, indicating a partial understanding and application of the grade level expectations defined for Michigan students.

Level 4: Not Proficient (L4)

The student needs intensive intervention and support to improve achievement. The student's performance is not yet proficient and indicates minimal understanding and application of the grade level expectations defined for Michigan students.

> For more information, please visit www.michigan.gov/meap

Subject	2013 Achievement Scale Score Performance Level	2012 Achievement Performance Level	Student's Performance Level Change
Reading	Nonstandard Accommodation No Data Reported	3-Partially Proficient	Scores for your child could not be found for the current and/or prior test administrations; therefore a performance level change cannot be reported.
Mathematics	660 1-Advanced	3-Partially Proficient	Last fall, your child scored near the low end of the Partially Proficient performance level. This fall, your child scored near the middle of the Advanced performance level.
Science	Prohibited Behavior No Data Reported	* Not Available	* Not Available

DECLUTE FOR YOUR CHU D

Fall 2013 Version: 1.0

P0JHVJ003

^{*} Science, social studies, and writing are not measured in every grade, so year-to-year progress cannot be reported.

Reading

On the reading assessment the students were asked to read for On the reading assessment cross texts and respond to read for understanding within an across texts and respond to multiple-choice questions and one constructed response question (short essay). All questions on the reading assessment are based upon the Michigan Department of Education English Language Arts Grade Level Content Expectation of (ELCEs) for reading. (www.michigan.gov/ela)

Test Score Not Valid

Points Points Reading Domains Earned Possible Correct Word Recognition & Word Study Informational Text Fc Comprehension

Mathematics

At the beginning of fifth grade, students are expected to count, read, write, and compare whole numbers up to 1,000,000. They can fluently add and subtract multi-digit numbers, multiply two-digit by three-digit numbers, divide subtract multi-digit numbers, multiply two-digit by three-digit numbers, divide by numbers 10 or less, and use these computations to solve applied problems. The students have developed their understanding of factors and multiples, can estimate sums, differences, and products, and can find the value of the unknown in simple equations. The students have a good understanding of fractional quantities, including decimal fractions, as both part of a whole and part of a set, can compare and order them, locate them on the number line, and find equivalent forms. The students are able to use common measurement tools with precision, can convert quantities within a measurement system (e.g., 2 ft. = 24 in.), and can find perimeters and areas of rectangles. The students understand and use basic properties of 2-D and 3-D shapes to solve problems, can solve problems comparing data presented in bar graphs and tables, and find medians. (www.michigan.gov/mathematics)

The mathematics focal points at the right show the points earned by your student, the points possible, and the percent correct.

A STUDENT AT THE **ADVANCED** LEVEL: Performed mathematical skills, understood concepts and solved complex, non-routine problems consistent with grade level expectations. With instructional support, the student should continue to excel.

During the elementary school grades, students observe and explore the science of living things, the physical world around them, and the elements and processes that make up and affect Earth. Students begin to use inquiry skills to construct new scientific knowledge to make sense of their observable world. They use their senses to test predictions that answer questions. Students reflect on scientific knowledge to decide whether evidence supports decisions that may affect their lives. (www.michigan.gov/science)

What is the margin of error (--)?
The diamond indicates your child's scale score for the tested subject. This is your child's overall subject scale score and is used to determine the level your child achieved. The horizontal bar indicates the margin of error. If your student had taken this same test or a similar test on another day, he/she would likely have scored within this range.

MEAP - FALL 2013 Guide to Reports 21

Class Roster

The Class Roster provides summary score information for each subscore grouping (domain, focal point, or discipline) and GLCE assessed within each subject area, as well as detailed information for each student assessed. This report may include multiple pages to report all subscore groupings and GLCEs. This report will be sorted by class/group code (if a Class/Group ID Sheet was returned to the scoring contractor or a class/group code was added during Tested Roster). The Writing Class Roster reports the multiple choice test items results on the first page of the report. The second roster page will display the Narrative, Informational, and Peer Response results for each student. Science results are displayed by form number.

Section A identifies the title of the report, the grade level reported, the assessment cycle, the subject area and, for science, the form number. The teacher name, class/group code, the school name and code, and the district name and code are also provided.

Section B lists each student's name followed by their Unique Identification Code (UIC), and Date of Birth (DOB). The scale score and performance level attained by the student for the current year are reported for all subjects. The previous year performance level, as well as the performance level change, is reported for mathematics and reading.

If a student's test was marked invalid, a reason code is reported in place of the scale score. Descriptions of the codes are listed at the bottom of the page. Performance data is not provided for invalid tests in Section C . Invalid scores are not included in mean calculations.

Section C provides the following information for each subscore grouping and GLCE, detailed by student:

- GLCE assessed
- Number of points possible
- Number of points earned by the student
- Reading constructed response and writing prompt rubric scores and condition codes for reading and writing

Students who were assessed with a braille or an emergency test form are indicated with an asterisk. While the scale scores for these students are reported and included in the scale score mean calculations, they are not included in the more detailed subscore reporting and calculations.

Section D reports the number of students assessed within each class/group code and the mean score for each subscore grouping and GLCE. As stated above, students with invalid tests are not included in the mean calculations.

Item Analysis Report

The Item Analysis Report provides summary information for each operational multiple choice item and constructed response item on the assessment, including the primary Michigan Grade Level Content Expectation (GLCE) measured by each item. The summary information reports the percentage of students selecting each response and indicates the correct response. The Item Analysis Report is generated for three student populations:

All Students Students with Disabilities All Except Students with Disabilities

The aggregate data is reported by class/group, school, district, and state. This report may include multiple pages.

Section A identifies the title of the report, the student population included in the report, the grade level, the assessment cycle, and the subject area. The teacher name, class/group code, the school name and code, the district name and code, and the number of students assessed are also provided. Please note that students who participated using a Braille or Emergency test form, or who are home-schooled, are not included in the assessed count. In addition, only students with valid scores are included in the count.

Section B lists the Item Descriptor Number, reporting category, and GLCE being assessed for each multiple choice item. The Fall 2013 Item Descriptors for each grade level and subject area will be posted **as they become available** on the MEAP website at www.michigan.gov/meap.

Section C indicates the percentage of students selecting each response to the multiple choice questions in section B. A plus sign (+) denotes the correct response. The percentage of students skipping or omitting an item, as well as the percentage of students filling in multiple bubbles for a given item, are also reported. Science is reported for the total group on the first page, then this is followed by results by form number. Most schools will have Form 1 results along with results for the form assigned to the school/district.

Section D (applies to reading and writing only) lists the Item Descriptor Number, the GLCE being assessed, and the Mean Score for the constructed response item. The percentage of students achieving each score level are reported, as are the number of student responses that received each condition code. A mean comparison table for the Narrative and Informational Writing prompts is provided at the bottom of the page to facilitate a quick review.

Condition codes provide a reason the student's response received a score of zero (0). Possible condition codes are listed below:

A = Off topic

B = Illegible or written in a language other than English

C = Blank

D = Insufficient to rate

E = Incorrect Answer (reading only)

‡ For SWS only, A = Off-topic/Off-task (This applies only to the Student Writing Sample.)

Use of Item Analysis Results

Some assessment items may be particularly difficult or easy. Educators may consider how well their student groups did on an assessment item or sub-score grouping in relation to the state results reported. State results provide a good comparison for how easy or difficult an assessment item was for all students.

Some GLCEs may be assessed by only a single item. This may make interpretation of item analysis reports more difficult. However, many GLCEs are assessed by multiple items. In most situations, a larger number of assessment items provides more reliable results which is more likely to support inferences teachers and curriculum leaders might have with regards to student performance at the GLCE, domain, focal point, or content area level.

Therefore, teachers and districts may use the Item Analysis Report to pose a hypothesis about how a group of students performed within a GLCE or a sub-score grouping (domain, focal point, or discipline). This hypothesis should be evaluated in light of the number of items assessed and in combination with other assessment and classroom information and professional judgment.

Fall 2013 Version: 1.0

P0JI2X00A

Summary Report

This multiple page report provides a comparative set of mean scale score information for each grade level, summarized by school, district, ISD, and state. The Summary Report is generated for three student populations:

All Students

Students with Disabilities

All Except Students with Disabilities

Section A identifies the title of the report, the level of aggregation (school, district, ISD, or state), the student population reported, the grade level, the assessment cycle, and the subject area. School, district, and ISD names and codes are included.

Section B provides achievement summary data for multiple years for each subject area. The summary data reported includes the year, the number of students assessed, the mean scale score, scale score margin of error, the percentage of students attaining each achievement level, and the percentage of students that achieved proficiency, meaning they attained either a Level 1 (Advanced) or Level 2 (Proficient) for that subject area. The four most current years of summary data are reported. These data have been recalculated using the career– and college-ready cut scores established in September, 2011. Home schooled students are excluded from the students assessed count at all reporting levels. Private school students are included only at the school level. ISD level reports include both LEA districts and charter schools within the ISD boundaries.

Section C provides summary data on student performance level change compared to the previous administration of the reading and mathematics MEAP tests. The summary data includes the current year and the previous year, the number and percentage of students matched across the two administrations, and the percentage of students in each sub-category of performance level change (e.g., Significant Decline, Decline, Maintaining, Improvement, and Significant Improvement) within each subject area.

Section D provides a progress table with year-to-year transition counts for students in grades 4-8 who were in the previous grade in Fall 2012, took the MEAP in both fall 2012 and fall 2013, and had a matching Unique Identification Code (UIC) for both assessment cycles. This data is provided for mathematics and reading. There is no progress table provided for science, social studies, or writing as those subjects are not assessed in each grade. The progress tables provide the number and percentage of students matched between previous and current MEAP administrations.

Section E provides summary data for each subject area score distribution at the school level only. The summary data reported includes the code and descriptor for each GLCE, the number of students assessed (by form number for science), the mean points earned, the total number of points possible, and the percentage of students earning each point value.

Page 4 of 15 Fall 2013 Version: 1.0 P0JHVC004

Demographic Report

The Demographic Report provides a summary breakdown of scores by demographic subgroup for each subject area assessed. Summary data reported includes the number of students assessed in each subgroup, the mean scale score, the percentage of students attaining each performance level, and the percentage of students in the "Advanced" and "Proficient" performance levels (Levels 1 & 2) within each subject area. The Demographic Report is generated for three student populations:

All Students

Students with Disabilities

All Except Students with Disabilities

The demographic subgroup scores are aggregated by school, district, ISD, and state. The demographic subgroups are:

Gender

Ethnicity

Economically Disadvantaged (ED)

English Language Learners (ELL)

Formerly Limited English Proficient (FLEP)

Migrant

Homeless

Accommodations subgroups are also reported as follows:

Standard Accommodations (All Students)

Non-Standard Accommodations (All Students)

Standard Accommodations (for English Language Learners)

Non-Standard Accommodations (for English Language Learners)

Please note the following: 1) summary scores are not provided for subgroups containing less than ten students, 2) home schooled students are not reported, 3) private school students are only reported at the school level, and 4) students with invalid tests are included only in the Non-Standard Accommodations subgroups. There is not a separate reporting subgroup for students enrolled in the district less than one full academic year (LTFAY); all students who tested, unless specified above, are reported. The determination of LTFAY for AYP purposes will be calculated separately from the enrollment data submitted via the Michigan Student Data System (MSDS).

Section A identifies the title of the report, the level of aggregation (school, district, ISD, or state), the student population included in the report, the grade level, and the assessment cycle. School, district, and ISD names and codes are included, as applicable.

Section B lists the demographic subgroups, as well as the total student population being reported. Ethnicity subgroups are defined by federal requirements.

Section C reports the number of students included in the subgroup, the mean scale score, the percentage of students attaining each performance level, and the percentage of students in the "Advanced" and Proficient" performance levels (Levels 1 & 2) within each subject area.

Note: Results are not reported for groups of <10.

- No scores or percents provided if less than 10 students.
 Value may not equal the exact sum of Level 1 & Level 2 due to rounding.
 Results for these students are invalid and not reported. They are not included in the Total Students count.

Page 3 of 3 Fall 2013 Version: 1.0 P0JHWO006

Comprehensive Report

The Comprehensive Report provides mean scale score and performance level information for each grade level summary by subject area. The District Comprehensive Report lists data for the district, followed by each public school and PSA that is part of the district. The ISD Comprehensive Report provides the data for the ISD as a whole and for each district and Public School Academy within the ISD. Home schooled and private school students are not included on the Comprehensive Report. Only students with valid tests are included in the Number of Students Assessed count.

Section A identifies the title of the report, the level of aggregation (District or ISD), the student population included in the report, the grade level, and the assessment cycle. District and ISD names and codes are included as applicable.

Section B identifies the ISD, district, and schools as determined by the report aggregation (District or ISD).

Section C provides the number of students assessed, the mean scale score, the percentage of students attaining each proficiency level, and the percentage of students that met or exceeded grade level expectations for Michigan students within each subject area.

Note: Results are not reported for entities with <10 students.

To access Fall 2013 MEAP results, there are several options available to you. These options include the following:

1. BAA Secure Site Data files

Three data files are available for download from the BAA Secure Site Student Test Scores window for authorized school and district users. The BAA Secure Site can be accessed by authorized users at www.michigan.gov/baa-secure. These files are:

- Student Data File— includes individual student test results and performance
- Aggregate Data File—includes aggregated school, district, or ISD assessment results
- Student Analysis File Extract (SAFE) contains item level data for each student with a valid test score in a given subject

2. MI School Data

MI School Data is an online portal that provides views of Michigan education data to help make informed educational decisions, to help improve instruction and to enable school systems to prepare a higher percentage of students to succeed in rigorous high school courses, college and challenging careers. (www.michigan.gov/mischooldata)

3. Writing CDs

CDs containing the images of the 4th and 7th grade writing responses will be mailed to MEAP District Coordinators. The CDs are produced by school and, in addition to the student responses to the writing prompts, will include scoring guides for each of the three types of writing prompts. The scoring guides for writing can also be found on the MEAP website (www.michigan.gov/meap).

4. MEAP Downloadable Data Files

There are a number of downloadable files available to the public from the Downloadable Data Files link on the MEAP website (www.michigan.gov/meap). These files include gap analysis, demographics, and proficiency comparisons for both public and non-public schools. These files will be made available when MEAP results are released to the public.

5. Public Interface to the BAA Secure Site

The Demographic Report (described on pages 36 – 38 of this guide) can be accessed through a public interface of our BAA Secure Site. This report can be filtered by State, ISD, District, or School. The interface can be accessed from the MEAP Test Results link on the MEAP web site (www.michigan.gov/meap).

Contact Information

School administrators, teachers, and counselors should become familiar with the report layouts and information contained in this document. If you have questions after reviewing this Guide to Reports, or need additional information about MEAP administration procedures, content, scheduling, appropriate assessment of or accommodations for students with disabilities or English language learners (ELLs), please contact the Michigan Department of Education, Division of Accountability Services, using the contact information listed below:

Division of Accountability Services
